Re: Modine Manufacturing Company – Camdenton, MO
Quarterly Report for period ending December 31, 2010
AOC No. 99-HW-002

Dear Ms. Kump-Mitchell:

The following is a summary report of the activities completed from September 30, 2010 through December 31, 2010 at the above referenced site. This report is being submitted as required by the Corrective Action Abatement Order on Consent, Order No. 99-HW-002 (AOC) paragraphs 91 through 94.

Description of work completed during the quarter:

On December 10, 2010, CH2MHill completed its report "2010 Indoor Air Sampling and Analysis". The report summarizes sampling activities which occurred at the Camdenton site in August, 2010, presents analytical results, reviews laboratory control data and field quality control procedures utilized, and presents conclusions and recommendations.

Summary of findings, data, etc.:

The CH2MHill "2010 Indoor Air Sampling and Analysis" report indicates that the August samples contained significantly decreased trichloroethene (TCE) levels over those obtained during the 2003 sampling event. The August results are briefly summarized as follows:

- Four of the six indoor sampling locations exceeded the NYSDOH screening level for TCE.
- All six indoor sampling locations were less than Missouri Department of Natural Resources' (MDNR's) target risk level.
- All six indoor sampling locations were less than US EPA's screening level based on USEPA's "Toxicological Review of TCE" dated June 2009.

Summary of problems or potential problems and any corrective measures implemented:

No problems were encountered during the quarter being reported.

Projected work for the next reporting period:

- Modine will be submitting a copy of the "2010 Indoor Air Sampling and Analysis" report to the MDNR and the Camdenton site property owner, Mr. Richard Martin of RAASMartin, LLC.
- Modine will continue to monitor US EPA's progress in finalizing its toxicological review of TCE which is expected to be completed in mid-2011.
- Future actions necessary to obtain site closure under the AOC will be identified pursuant to US EPA's issuance of its toxicological review of TCE.

Instances of Non-compliance with the requirements of the Order:

There were no instances of non-compliance with the requirements of the Order during this reporting period.

If you have any questions concerning this report, please contact Mr. Thomas E. Meitner, EH&S Manager at (262) 636-1412, or by email at t.e.meitner@modine.na.com.

Sincerely,

David L. Lidester
